

green is right

Ambience and Styling

Udyan is built aesthetically amidst cheerful, green surroundings. It has a unique, unconventional design and layout. We don't have cramped, cloistered halls where the guests would feel stifled and uncomfortable. At Udyan, you can savor the fluidity of our multi-functional space that is open, uncluttered and without bounds. In parties, it invites you to move around and meet people, and feel at home. It's an ideal get away where you can forget the humdrum of the surrounding city!

Wider range of add-on services and satisfaction guaranteed

Udyan is designed with a deep insight and vision into your requirements, with a commitment to unburden your worries and give you absolute satisfaction. Our space as well as services is versatile, adaptable and cost-efficient. To top it all, we have designed several packages for you keeping in mind your various requirements, status and of course affordability. We have the capacity to take in and serve a wide variety of customers at wider variety of price points. Whatever be your requirement, lend the burden to us, and relax and enjoy the party like a guest.

Space Utilization

At 9000 sq ft of contiguous space in two halls, with a 3600 sq ft lawn in between, Udyan is impressive and convenient, but our real success is in the planning and utilization of space. This makes Udyan different from other convention centers. Here, space is laid out in such a way that it can be put to maximum use and no corner is left unusable. Also, the lay-out is such that the available space can be used in many different ways. The entire space can be easily divided into sections, or used as a single stretch. Scalability and stretchability are important features of Udyan. Be it a wedding, exhibition, trade fair or reception, the space yields maximum utility and flexibility. Our building does not impede or limit the maximum usage of space.

Facilities
